

Build your own Lil' Ivar

Directions on page 2

Ivar's Hat

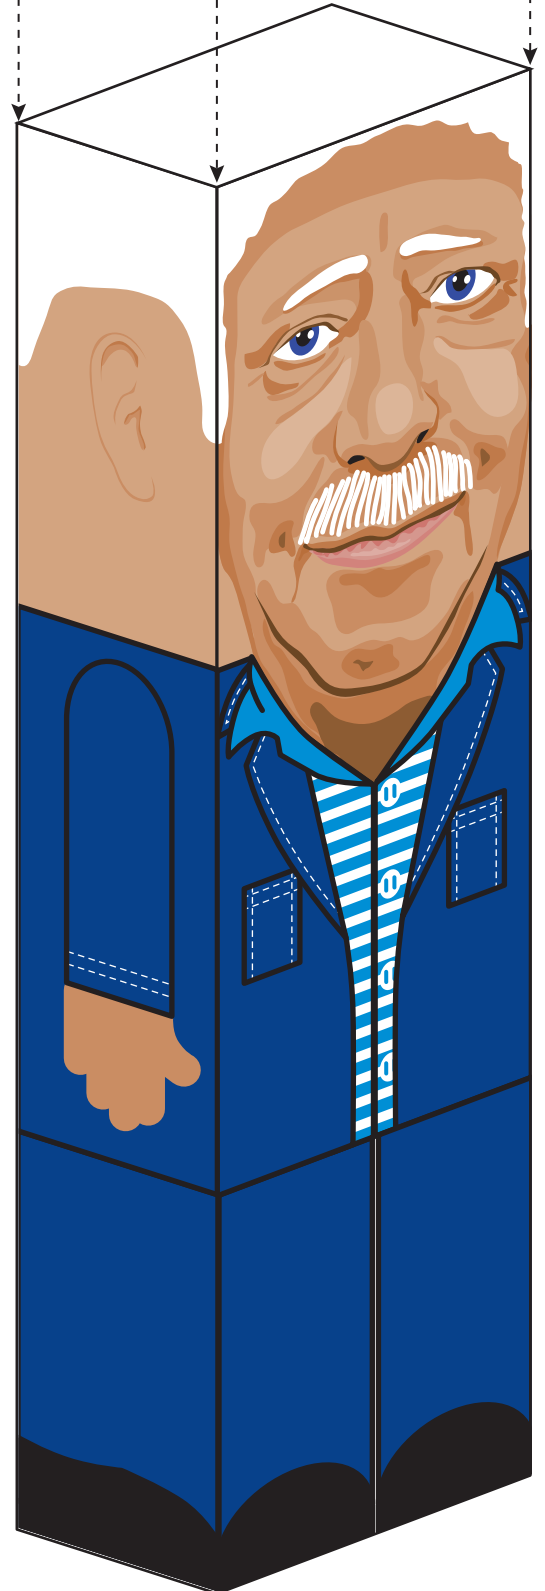

DIRECTIONS:

- 1) Cut out all pieces with a hobby knife or scissors.
- 2) Assemble by folding tabs along lines.
- 3) For Ivar, tape tabs A and B, then the large tab.
- 4) For Ivar's hat, repeat step 1, carefully cutting a slit along the dotted white line on the top of his hat.
- 5) Gently fold along the solid white lines on either side of the hat.
- 6) Tape black tabs under the back blue flap and the hat front.
- 7) Put the hat on Ivar and have fun with your new lil' buddy.

HELPFUL HINTS:

- 1) For a sturdier figure, glue print on heavier paper before cutting out, or print on cardstock.
- 2) Before cutting, if using cardstock, gently score the fold lines with a thin, dull tool, like the edge of a plastic fork.
- 3) Use double stick tape for a clean looking Ivar.
